PROJECTS

Portfolio Website

JUN 2024

This project involves creating a portfolio website to present my profile. It highlights my background, interests, technical skills, and projects. The site is designed to showcase my work and achievements, making it easy for potential collaborators and recruiters to learn about me and get in touch.

(Next.js, Tailwind CSS, Aceternity UI)

MindPhix - Mental Health Web Application

OCT 2023 - MAR 2024

Mindphix is a comprehensive mental health application that combines depression assessment, providing personalized recommendations, weekly progress report and a depression awareness chatbot, providing a holistic approach to support individuals in coping with depression.

(Next.js, Tailwind CSS, Firebase, Python, Flask, Dialogflow)

Airline Reservation System

DEC 2023

The airline reservation system is a user-friendly application allowing travelers to search, book, and pay for flights effortlessly. It also enables easy cancellation of reserved tickets, providing convenience and flexibility to passengers throughout their journey.

(Java, JavaSwing, MYSQL)

St. Regis - Hotel Management Application

APR 2023

The St Regis web application streamlines the hotel experience, enabling guests to conveniently search room availability, view room details, explore on-site restaurants, and discover local attractions. With a user-friendly interface and mobile responsiveness, the application empowers visitors to plan their luxurious stay seamlessly.

(HTML, CSS and JavaScript)

Students Progression Outcome Application

MAR 2023

Implement a progress level checking system running on the console using Python in the first year. There are two versions of this system: the student version and the staff version. Using this system, staff members can check the progress level of multiple students, while students are only allowed to check their progress level.

(Python)
